

# 動作の確認

## 1 ・ Apache の設定

「vi /etc/httpd/conf/httpd.conf」で、末尾に以下のコードを追加

```
ProxyPass /test/ ajp://localhost:8009/testApp/
ProxyPassReverse /test/ ajp://localhost:8009/testApp/
# Supplemental configuration
#
# Load config files in the "/etc/httpd/conf.d" directory, if any.
IncludeOptional conf.d/*.conf

ProxyPass /DocoTsubu/ ajp://localhost:8009/DocoTsubu/
ProxyPassReverse /DocoTsubu/ ajp://localhost:8009/DocoTsubu/

ProxyPass /test/ ajp://localhost:8009/testApp/
ProxyPassReverse /test/ ajp://localhost:8009/testApp/
```

「systemctl restart httpd」で再起動させて読み込ませる

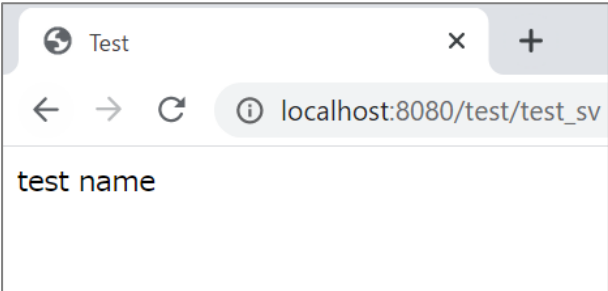

```
[root@localhost WEB-INF]# vi /etc/httpd/conf/httpd.conf
[root@localhost WEB-INF]# systemctl restart httpd
```

## 2 ・ MySQL にテスト用データベースを作成

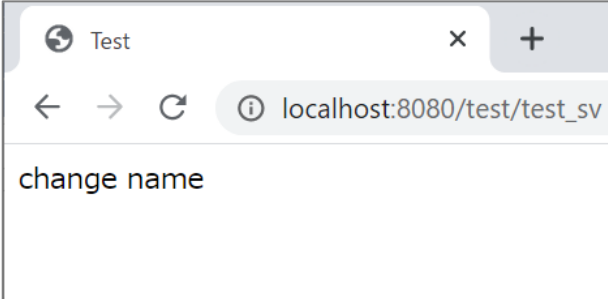

MySQL にログインし、データベースを作成

mysql> CREATE DATABASE test_db; Query OK, 1 row affected (0.01 sec)	CREATE DATABASE test_db;
mysql> USE test_db; Database changed	USE test_db;
mysql> CREATE TABLE test_tb( -> mid CHAR(5) PRIMARY KEY, -> name VARCHAR(20)); Query OK, 0 rows affected (0.03 sec)	CREATE TABLE test_tb( mid CHAR(5) PRIMARY KEY, name VARCHAR(20));
mysql> INSERT INTO test_tb -> VALUES('00001','test name'); Query OK, 1 row affected (0.01 sec)	INSERT INTO test_tb VALUES('00001','test name');
mysql> SELECT * FROM test_tb; +-----+-----+   mid     name     +-----+-----+   00001   test name   +-----+-----+ 1 row in set (0.00 sec)	SELECT * FROM test_tb;

### 3・ブラウザからアクセスする

	<p>「<a href="http://localhost:8080/test/test_sv">http://localhost:8080/test/test_sv</a>」 でアクセスし、 「test name」と表示されれば OK</p>
---	--

### 4・データベースの編集が反映されるかを確認

<pre>mysql&gt; UPDATE test_tb SET -&gt; name='change name' WHERE mid=00001; Query OK, 1 row affected (0.00 sec) Rows matched: 1  Changed: 1  Warnings: 0</pre>	<pre>UPDATE test_tb SET name='change name' WHERE mid=00001;</pre>
<pre>mysql&gt; SELECT * FROM test_tb; +-----+-----+   mid     name         +-----+-----+   00001   change name   +-----+-----+ 1 row in set (0.01 sec)</pre>	<pre>SELECT * FROM test_tb;</pre>
	<p>web ページを「F5」で更新し、 編集内容通りに表示されれば OK</p>
